

# Turn simple straws into Summer Fun!!!

## What you need:

- Foam Craft Sheets in bright colors (or construction paper)
- Tacky Glue
- Black marker
- Straws

## What you do:

1. Cut fun shapes out of foam sheets. Use the patterns we have provided (you will have to enlarge on copy machine) or create your own.
2. Cut horizontal slits to weave straw through. If you want to hide the slits, use pieces to glue over it. On the fish, we cut out a fin, on the umbrella and flower, we glued on circles. On the sun, we let the straw show.
