

Bottle Bird Feeder

This Super Simple Project will make a lot of birds really happy!

What you need:

- Water Bottle
- Chenille sticks (2)
- Styrofoam Paper Plate
- Heavy String
- Craft (exacto) knife
- Nail
- Hammer

sample

What you do:

1. Using craft knife *carefully* cut 4 holes approx 1/2" dia. in the bottom sides of plastic bottle ((just above the base)
2. Run Chenille stick in 1 hole and out another. Run the other chenille stick through the remaining 2 holes (see sample).
3. Poke both ends of both chenille sticks through the styrofoam plate. Pull tightly so bottle stand upright (careful not to tear plate).
4. Twist ends chenille ends together on underside of plate.
5. Using nail, hammer a hole in bottle cap. Push string through.
6. Tie a very large knot on end of sting. Fill. Replace cap.
